ACCREDITED TRAINING COMPANY

About Us

Central Plant Services Arabia was established in Dhahran, Saudi Arabia, in 1999 to meet the specialized needs of lifting equipment in the vast petro-chemical, power, oil & gas, and industrial sectors of the Saudi and GCC markets.

We are independent of any particular manufacturer, enabling us to deliver technical support for all lifting equipment throughout our sphere of operation. A member of the Lifting Equipment Engineers Association (LEEA) since 2005, CPS became the first Full Member from Saudi Arabia after passing their rigorous technical audit in 2011.

CPS inspectors and service teams are trained for and experienced with the safety and technical requirements of our major clients. To enhance further their professionalism and qualifications we enroll them for courses and accreditation by the LEEA.

OUR VISION

To be a market leader in world-class lifting equipment services throughout all areas of industry.

QUALITY ASSURANCE

Our company safety and quality management system shall comply with the requirements of applicable international standards, in particular those of LEEA.

OUR MISSION

To provide a service that meets agreed specification; to follow consistent and reliable standards; to conform to customer requirements, statutory requirements and best practice.

Great Vision, Great Team

We are passionately committed to excellence and this is the force behind our success.

Safe and Professional Lifting Equipment Services

Assessment Inspection

To **evaluate** present condition:

- Full technical audit
- Detailed inspection report
- Accurate deficiency list
- Repair plan and cost estimate

Repairs and Upgrades

To **establish** reliability:

- Break down repair service anytime!
- Spare parts solutions
- Components and critical systems upgrades

Safety Inspection & Load Testing

To **determine** ongoing worthiness:

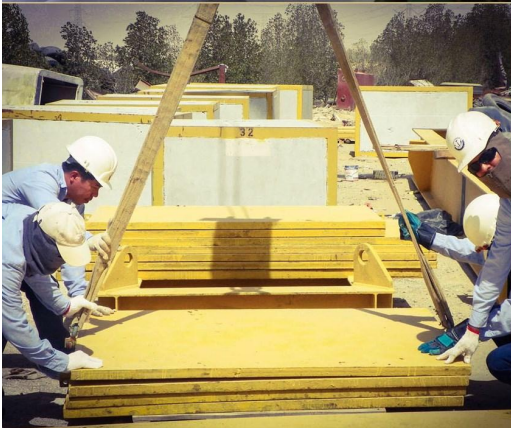

- Reliability inspection
- Proof load testing

Periodic Maintenance (PM)

To **maintain** operational dependability:

- Comprehensive PM programs
- Designed with customer operations in mind
- Quarterly, 6-monthly and Annual PM

REID PORTA-GANTRY product family has won the 'Innovation' category of the prestigious Queen's Award for Enterprise, and our business' dedication to quality and safety has been recognised by the following accreditations and memberships.

ISO 9001 (Quality Management)

ISO 14001 (Environmental Management)

OHSAS 18001 (Occupational Health and Safety Management Systems)

LEEA (Full Membership) (Lifting Equipment Engineers' Association)

Personal Lifting

Almost the whole of REID's product range can be adapted for personnel lifting (man-ride) usage, and in many cases systems can be dual-rated for both goods and personnel lifting. For over 15 years, REID has provided a wide range of standard and custom personnel lifting and fall arrest and retrieval solutions for confined space and work at height use (with EN795 Class B classification).

CPS Arabia is an authorized agent for REID Lifting of the UK in Bahrain and Saudi Arabia

CRANE OPERATOR TRAINING

The most simple and cost effective way to improve safety and productivity, while reducing maintenance costs. The majority of crane accidents are caused by human error which may result in equipment/property damage, and injuries to:

***Operators,
Other site workers,
People nearby***

Accidents can be minimized or prevented through proper training and crane usage.

The benefits of dealing with a LEEA accredited training company are:

- All courses are delivered by LEEA member companies
- All courses are written to a LEEA approved outline
- All course materials and training facilities have been audited by LEEA
- All instructors have been assessed by LEEA
- All training certificates are individually numbered and verifiable with LEEA
- All companies are reassessed at regular intervals
- All instructors are reassessed at regular intervals

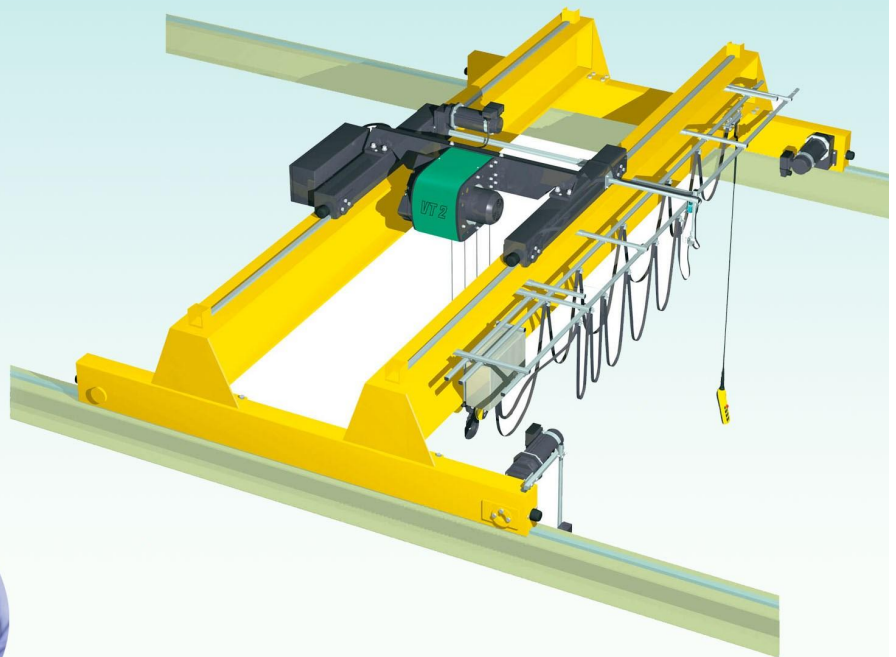

We offer specialized training and instruction developed under the guidance of the Lifting Equipment Engineers Association (LEEA), for OVERHEAD CRANES and soon for MOBILE and TOWER CRANES.

Participants will learn international standards and local requirements for crane operation and crane inspection procedures required by these. Topics also cover:

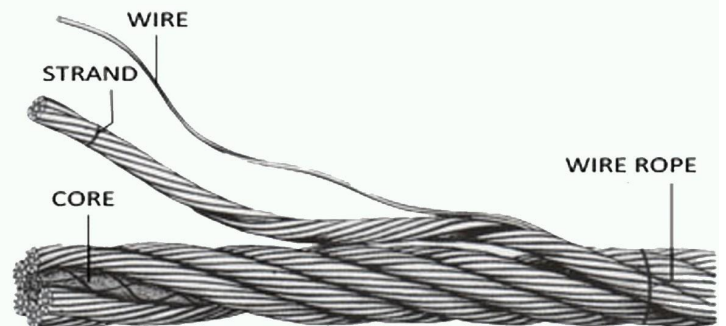

Correct identification and function of all major crane components and assemblies:

BASIC RIGGING

Wire Rope Technology

Causes and **Preventions** of crane accidents is also a major topic in our training manual

Our training is supported by well-illustrated student textbooks and reference manuals, professional Power Point presentations, interesting videos to demonstrate practical examples, and:

Desktop Simulators

for:

*Overhead,
Tower and
Mobile Cranes*

Full size 3-D simulator for Mobile Cranes with multiple stations for Operator, Signal Person and Instructor. This has built in applications for winds and ocean tides for off-shore applications

Follow Us..

It is our pleasure to contribute to the development of our country and region. On behalf of our team I thank you for taking the time to read about our company and its capabilities and I look forward to establish a mutually beneficial business relationship. **Yassin Al-Hussain (CEO)**
